Nature is the future

Shiny Takes Action for the Environment

In 2014, Shiny signed a memorandum with the Taiwanese Government on a solar power generating project. Shiny has cooperated with the Taiwanese Government, setting up solar panels on all of the roofs at its three factory sites to produce green energy.

According to Taiwan Power Company (Taipower) and Industrial Technology Research Institute (ITRI), the project is estimated to produce 757,000 kWh from solar power per year, achieving 386,000 kg of CO_2 savings. In other words, Shiny creates 386,000 kg of carbon credit through its contribution every year.

In addition, Shiny also emphasizes its devotion to an eco-friendly environment by planting nearly 400 trees and plants on its factory sites. Shiny has done all of these because it believes in operating without harming Mother Nature.

rPET Series is made with 100% Recycled PET from used water bottles.

Shiny creates 386,000kg of carbon credit through its contribution in solar power generating every year.

Shiny Stamp is committed to make the Earth a better place, and we appreciate your helps to achieve this goal together.

The handle will not cramp your hands, and the soft material provides a comfortable feel.

Elegant Design

The metal frame structure leads to an elegant feeling of design that sets apart from the stereotype.

Lock Button

The lock ensures easy operation for stamp makers, and for the users when changing ink pad and adjusting dates or numbers.

Solid Structure

The curved metal frame ensures durability for frequent use. The silent device allows quieter and smoother movement.

The Essential Line and Heavy Duty also feature non-slipping feet that keep the stamp in place while making imprints.

Full Size Display Window
